Practical Examples Lets consider a simple example projectile motion Faires and Chambers meticulously breaks down this seemingly simple

problem covering the derivation of equations of motion considering air resistance a more advanced topic and providing various worked examples to demonstrate different scenarios

**Howto Solving a Simple Problem Using Concepts from the Book**

Lets tackle a basic problem finding the range of a projectile launched at an angle with initial velocity  $v$

- 1 Identify the relevant equations The book will provide the equations of motion for projectile motion considering only gravity
- 2 Apply the equations Use the equations to find the time of flight  $t$  and the horizontal distance  $R$  traveled
- 3 Solve for the range The range  $R$  is the horizontal distance traveled when the projectile hits the ground Substitute the value of  $t$  obtained in step 2 into the equation for horizontal distance to solve for  $R$  This is a simplified example Faires and Chambers covers far more complex scenarios and methods
